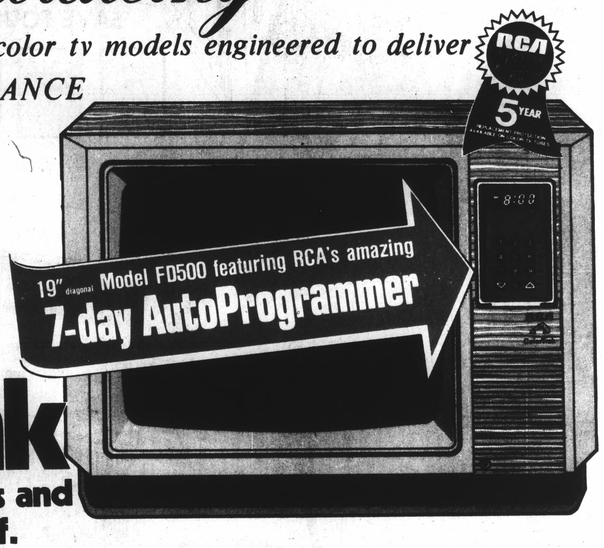
CELEBRATING RCA'S 25th. ANNIVERSARY OF COLOR T.V. WE TAKE PRIDE IN

Introducing

A Special Series of color tv models engineered to deliver the FINEST PERFORMANCE in color tv history!!!

RCA AutoProgrammer ColorTrak

turns on, changes channels and turns off... all by itself.



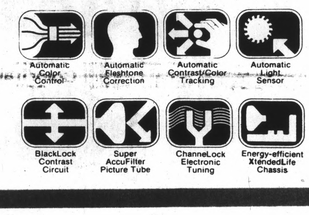
Look what you can program it to do!

Schedule a week's viewing in advance. RCA's FD500 will automatically turn itself on, switch channels, and turn off—all at the times you have programmed into its computer memory. L.E.D. digital clock shows time continuously when TV is off.

The FD500 will wake you to your favorite TV show in the morning—Monday through Friday—with just one program command. It can also be pre-set to turn itself off after you've fallen asleep at night.

To improve home security, plug a lamp into the FD500's built-in AC outlet, and it will automatically turn on and off—along with the TV—at pre-set times. An effective way to discourage intruders when you're away from home.

Plus...you get ColorTrak's 8 great automatic color systems



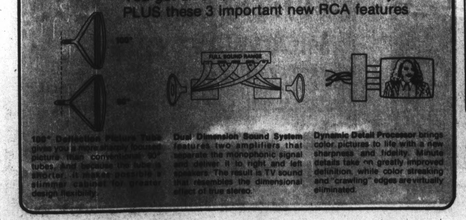
RCA ColorTrak

Limited Edition ColorTrak by RCA

You are invited to see what may be the most advanced Color Television being made today—RCA's "Limited Edition" ColorTrak. With a color picture that is demonstrably superior to any ever made by RCA. With TV sound that far exceeds what you've come to expect. And with slim-line cabinetry to please the most discriminating taste. Because of limited availability, we suggest a demonstration at your earliest opportunity.

ChanneLock Remote Control
(in all Limited Edition models except FD495)
Turn set on and off, adjust volume, tune in either direction through all 82 channels—all from the comfort of your easy chair. Channel number and time are displayed on screen when channel or volume buttons are touched.

You get all of ColorTrak's 8 automatic systems PLUS these 3 important new RCA features



Dual Dimension Sound System features two amplifiers that separate the monophonic signal and send it to right and left speakers. The result is TV sound that recreates the dimensional ambience of live stereo.

Dynamic Detail Processor brings color pictures to life with a new sharpness and fidelity. Minute details take on greatly improved definition, while color streaking and "crawling" edges are virtually eliminated.

RCA

Come in for a demonstration of "Limited Edition" ColorTrak soon.
